General Information

Journal references in Mathematical Reviews (MR) appear in the following form: *J. Utopian Math. Soc.* (6) 5(56) (1994/95), *no.* 2, 18–53 (1996), where, after the abbreviated title, one has: (series number) volume number(volume number in first series, if given) (nominal date), issue number if given, first page–last page (imprint date). If only one date is given, it is the nominal date and follows the volume number. If no volume number is given, the year is used in its place. The symbol ★ precedes the title of a book or other nonperiodical that is being reviewed as a whole; the symbol Ⓥ precedes the title of a videocassette. If an issue of a journal is to be reviewed as a whole and an ad hoc title is devised for this purpose then this title appears in braces { }. Articles that have been accepted for publication in certain important journals are now reviewed in MR from the final manuscript; the symbol ○ at the end of a review denotes such an item.

References to reviews in Mathematical Reviews before Volume 20 (1959) are by volume, page number and position on the page (e.g., MR 15, 122c); from Volume 20 to Volume 58 (1979), by volume and review number (e.g., MR 20 #4185); from 1980 on, by issue and review number (e.g., MR 80a:46017). References to reviews in Jahrbuch über die Fortschritte der Mathematik are by volume, page number and position on the page (e.g., JFM 24.0048.02). References to reviews in Zentralblatt für Mathematik before Volume 218 (1972) are by volume, page number and position (last two digits) on the page (e.g., Zbl 047.06904); from Volume 218 on by volume and review number (e.g., Zbl 218.46017). Reviews reprinted from Referativnyĭ Zhurnal Matematika or Zentralblatt für Mathematik are identified by RZhMat or Zbl, respectively, in parentheses following the reviewer's name.

Authors' names are given as listed in the item being reviewed. In order to identify each author uniquely, MR has assigned to certain authors' names an identifying form of the name. Superscript numbers are used in identifying forms where necessary. The identifying form is added in brackets following the published name.

Most review headings include institution codes. An institution code, indicating the author's address as listed in the reviewed item, consists of two [or three] parts separated by hyphens (e.g., 1-MR [or F-LYON-P]); these parts designate the country, the university or institution [and the department]. The absence of a department code usually indicates Department of Mathematics. Institution codes are also used to indicate the reviewer location for some reviewers. A list of codes appears in the most recent Annual Index of Mathematical Reviews.

Editorial Office: MR is a publication of the American Mathematical Society; it is edited at the University of Michigan in Ann Arbor. All editorial correspondence should be addressed to Mathematical Reviews, 416 Fourth Street, PO Box 8604, Ann Arbor, MI 48107-8604, USA; it may also be sent electronically via Internet to MATHREV@AMS.ORG or by FAX to (313) 996-2916. All other correspondence should be addressed to the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248, USA. Orders should be addressed to the American Mathematical Society, PO Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.*

Subscription information: Beginning with the subscription year 1994, there is a new pricing scheme for products derived from the Mathematical Reviews database, including MR. The list price for a 1996 subscription to MR, including the annual index, is $5,300 = $4,950 (Data Access Fee) + $350 (Product Delivery Fee for MR paper or microfiche). For Institutional or Corporate Members it is $4,310 = $3,960 (Data Access Fee) + $350 (Product Delivery Fee for MR paper or microfiche). Sites which have paid the Data Access Fee can obtain additional subscriptions to MR for $350 each. Individuals who are affiliated with a site which has paid the Data Access Fee can subscribe to MR for $350. Subscribers to paper MR outside the United States and India must pay a postage surcharge of $60. Subscribers to paper MR in India must pay a postage surcharge of $153. Expedited delivery to destinations in North America is $108; elsewhere $379.

Back volumes information: Back issues are available for all volumes of MR; price information can be obtained from the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248. Back volumes are also available in microform from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106-1346.

Cumulative indexes: There are sets of cumulative author and subject indexes that cover the entire span of MR from 1940–1984.

For additional subscription information and information about other products derived from the MR database, contact: Membership and Customer Service, American Mathematical Society, PO Box 6248, Providence, RI 02940-6248; electronic mail = CUST-SERV@MATH.AMS.ORG; FAX = (401) 331-3842.

Mathematical Reviews (USPS 333-940) is published monthly plus, in December, an annual author and subject index issue, by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Periodicals postage paid at Providence, RI, and additional mailing offices. Postmaster: Send address changes to Mathematical Reviews, American Mathematical Society, PO Box 6248, Providence, RI 02940-6248.

PREFACE

This annual index of Mathematical Reviews (MR) is included with each subscription and is also available separately. It is also called Volume 28 of the Index of Mathematical Papers (IMP). Volumes 6–9 of IMP are the annual indexes of MR for the years 1974–77 and are available as a set. The 1978 annual index was the first to be included with each subscription. There are cumulative author indexes to MR that cover 1940–59 (Vols. 1–20), 1960–64 (Vols. 21–28) and 1965–72 (Vols. 29–44), subject indexes for 1940–58 (Vols. 1–19) and 1959–72 (Vols. 20–44), and author and subject indexes for 1973–79 (Vols. 45–58) and 1980–84.

The classification scheme used in the present index is the 1991 Mathematics Subject Classification (MSC). A copy of the 1991 MSC is printed in the back of the subject portion of this index.

The entries in the author, key and subject indexes are comprised of all items reviewed in MR during a given year and some items which will not be reviewed by MR but which have appeared in Current Mathematical Publications (CMP). A star (★) preceding a title indicates a book or other item that is reviewed as a whole. The symbol Ⓥ preceding a title indicates that the item is a videocassette.

Author index; separate key index

The entries in the author and key indexes give full bibliographic information. These entries are accompanied by review numbers {if available} and classification numbers; secondary classification numbers are given in parentheses. Entries are listed alphabetically by author; entries having several authors are listed in full under each author. Surnames consisting of more than one part (e.g., del Greco, van der Mee) are listed under the first capital letter. Collections of papers, proceedings, bibliographies, tables, etc. that are edited rather than authored are listed in the key index by title and by "key entry". For example, the publication entitled *Number theory* is listed under **Number theory** and is also listed under **Conference: Number Theory** and under the location of the conference. Some monographic series (e.g., American Mathematical Society Translations, Series 2) have entries under the series title in this index.

Arrangement of entries in the author and key indexes

For a given heading (i.e., the primary name of an author, or a title), full entries are listed in order of nominal publication dates; the cross-references are in MR number order after the full entries. The arrangement of each entry is the same as in the heading of its review in MR. The general form for entries is as follows:

Books, Monographs. (Coauthors {if necessary}) ★Title. (Language of original {if necessary}. Summary languages {if necessary}) [English translation of title {if necessary}] Miscellaneous information {edition, editors, translators, series, etc.}. Publisher, city, date. Pagination. ISBN. (Reviewer's name) Review number {if available} Primary classification (Secondary classifications {if necessary}).

Journal article. (Coauthors {if necessary} Title of article {in English translation if the original title is not in English, French or German}. (Language of original {if necessary}. Summary languages {if necessary}) [English translation of title {if necessary}] Journal abbreviation {including series number if necessary} volume number(volume number in first series {if given}) (nominal date), issue number {if necessary}, pagination (imprint date). (Reviewer's name) Review number {if available} Primary classification (Secondary classifications {if necessary}).

The first three digits of the review number of an item refer to the MR issue in which the review is published and the last five digits refer to its position within that issue. The first two digits after the colon are the general subject classification of the item.

The phrase "EA 96m" after an MR number indicates that an MR erratum or addendum to the review appears at the end of the 96m issue.

Subject index

The entries in the subject index are arranged in classification order. For a given classification, all entries with that classification as a primary appear first, with authored entries appearing before unauthored entries. These are followed by entries with that classification as a secondary. Again, authored entries appear before unauthored entries. Each section under a given classification is arranged in alphabetical order. For each entry, the author(s), title, language, translated title {if necessary} and the review number {if available} appear at the first author only. The entries for subsequent authors are cross-references to the first author. Complete bibliographic information is available in the annual author and key indexes as well as in the MR review.

Cross-references

There are four kinds of cross-references in these indexes:

Name variations. An author's preferred name is the variation of the name that MR has chosen on the basis of frequency and currency of usage. Items by a given author are usually listed under the author's preferred name. In the author index, cross-references to the preferred form are given from sufficiently distinct alternative forms of the author's name.

Authors in other capacities. In the author index, the names of persons associated with an item in a capacity other than that of author (e.g., editor, translator, subject of a biography, etc.) are also listed. In the subject index, such names appear in parentheses. In both indexes these items occur only as cross-references to complete listings.

Key entries. Cross-references for such entries as bibliographies, obituaries and references to special events are made to the authors of the papers in which these items appear, e.g. **Bibliography: Robinson, Raphael Mitchell** *see* **Henkin, Leon, 96f:01033**.

Unreviewed entries. Some entries in these indexes have not been reviewed in MR (e.g., items that do not appear to be in final form, or that are at the fringes of MR's scope) although they have been listed in CMP. Unreviewed items appear in the author, key and subject indexes in a format similar to that of reviewed items. For unreviewed items that are part of a collection, the review number in parentheses is a cross-reference to the table-of-contents review, i.e. (see 96x:xxxxx) or (96x:xxxxx). (Some such items were inadvertently omitted from the Annual Indexes for 1991–95. They are included in this index.) For unreviewed items that are not part of a collection, there is no review number cross-reference.

Transliteration

Since 1983, MR has used the Cyrillic transliteration in use by ANSI, LC, Zbl, ISI, and others. This is also the system used throughout this index. A Cyrillic transliteration table appears at the end of the author/key index.

Names of Chinese authors

The name of a Chinese author appears in the index in Western form. For example, Chen Fang Yue will be listed as Chen, Fang Yue, as though the author's name were Fang Yue Chen. The pinyin transliteration is used for mainland Chinese authors and the Wade-Giles transliteration is used for Taiwanese authors.

In an undertaking of this size, errors are inevitable, despite elaborate precautions and checks. The editors of Mathematical Reviews would be very glad to have their attention drawn to errors in this index and also in the earlier indexes.

Mathematical Reviews

— (*with* Garfinkle, David; Moncrief, Vincent; Swift, Carrie) Numerical simulation of two-polarization Gowdy T^3 cosmology. (English summary) *Differential geometry and mathematical physics (Vancouver, BC*, 1993), 13–21, *Contemp. Math.*, 170, *Amer. Math. Soc., Providence, RI*, 1994. (M. A. H. MacCallum) **96a:83040** 83C75 (83–04, 83C20, 83C35)
Berger, Bonnie (*with* Rompel, John; Shor, Peter W.) Efficient NC algorithms for set cover with applications to learning and geometry. (English summary) *J. Comput. System Sci.* **49** (1994), *no.* 3, 454–477. (Hans-Dietrich Hecker) **96a:68041** 68Q25 (05C85, 68Q22, 68U05)
Berger, Clemens Un groupoïde simplicial comme modèle de l'espace des chemins. (English and French summaries) [A simplicial groupoid as path-object] *Bull. Soc. Math. France* **123** (1995), *no.* 1, 1–32. (Summary) **96a:18010** 18G30 (55P35, 55Q05, 55U10, 57M05)
Berger, Fabienne (*with* Colombeau, Jean-François) Numerical solutions of one-pressure models in multifluid flows. (English summary) *SIAM J. Numer. Anal.* **32** (1995), *no.* 4, 1139–1154. (Summary) **96d:76085** 76N10 (35L65, 35Q35, 65M60, 76L05, 76M20)
Berger, James O. (*with* Bernardo, José M.) On the development of reference priors. (English summary) *Bayesian statistics*, 4 (*Peñiscola*, 1991), 35–60, *Oxford Univ. Press, New York*, 1992. (Summary) **96j:62004** 62A15
— (*with* Yang, Ruo-yong) Estimation of a covariance matrix using the reference prior. (English summary) *Ann. Statist.* **22** (1994), *no.* 3, 1195–1211. (N. Giri) **96b:62091** 62H12 (62F15)
— (*with* Brown, Lawrence D.; Wolpert, Robert L.) A unified conditional frequentist and Bayesian test for fixed and sequential simple hypothesis testing. (English summary) *Ann. Statist.* **22** (1994), *no.* 4, 1787–1807. (Gary Nan Tie) **96b:62025** 62F03 (62F15, 62L10)
— (*with* Yang, Ruo-yong) Noninformative priors and Bayesian testing for the AR(1) model. (English summary) *Econometric Theory* **10** (1994), *no.* 3-4, 461–482. (Baldev Raj) **96a:62086** 62M10
— (*with* Salinetti, Gabriella) Approximations of Bayes decision problems: the epigraphical approach. (English summary) Stochastic programming (Udine, 1992). *Ann. Oper. Res.* **56** (1995), 1–13. (Summary) **96b:90051** 90C15 (62C10)
— *see also* **Bayesian statistics**, **96j:62002**
Berger, Marcel Les paquets de cercles. (French summary) [Circle packings] *Differential geometry and topology (Alghero*, 1992), 23–64, *World Sci. Publishing, River Edge, NJ*, 1993. (Igor Rivin) **96e:52043** 52C15 (52C17)
— Géométrie et dynamique sur une surface. [Geometry and dynamics on a surface] Differential geometry, complex analysis (Italian) (Parma, 1994). *Riv. Mat. Univ. Parma* (5) **3** (1994), *no.* 1, 3–65 (1995). (Joel L. Weiner) **96g:53051** 53C22 (53–02, 58F17, 70D99)
— Seules les quadriques admettent des caustiques. [Only quadrics have caustics] *Bull. Soc. Math. France* **123** (1995), *no.* 1, 107–116. (D. R. J. Chillingworth) **96m:53009** 53A07 (53B50, 58C27, 78A05)
Berger, Marsha J. (*with* Saltzman, Jeff S.) AMR on the CM-2. (English summary) Proceedings of the Third ARO Workshop on Adaptive Methods for Partial Differential Equations (Troy, NY, 1992). *Appl. Numer. Math.* **14** (1994), *no.* 1-3, 239–253. (*see* **94m:65012**) 65M60
Berger, Melvyn (*with* Schechter, Martin; Sun, Guo Zhang) Infinite-dimensional singularity theory and bifurcation from equilibria for certain nonlinear evolution equations. *Topol. Methods Nonlinear Anal.* **4** (1994), *no.* 2, 341–353. (Jesús Hernández) **96h:58029** 58E07 (34G20, 35B10, 35K60, 47H15, 47N20, 58C27)
— (*with* Zhang, Luping) A new method for large quasiperiodic nonlinear oscillations with fixed frequencies for the nondissipative conservative systems. I. *Comm. Appl. Nonlinear*

Anal. **2** (1995), *no.* 2, 79–106. (Joël Blot) **96e:34069** 34C27 (70H35)

— (*with* Zhang, Luping) A new method for large quasiperiodic nonlinear oscillations with fixed frequencies for the nondissipative second order conservative systems of second type. *Comm. Appl. Nonlinear Anal.* **3** (1996), *no.* 1, 25–49. (Joël Blot) **96m:34078** 34C27

Berger, Michael (*with* Schwarz, Helmut) Logical valuation of connectives for fuzzy control by partial differential equations. (English summary) *Appl. Math. Comput. Sci.* **5** (1995), *no.* 4, 597–614. 93C42 (93C20)

Berger, Mitchell A. (*with* Freedman, Michael H.) Combinatorial relaxation of magnetic fields. Magnetohydrodynamic stability and dynamos (Chicago, IL, 1992). *Geophys. Astrophys. Fluid Dynam.* **73** (1993), *no.* 1-4, 91–96. (Louis H. Kauffman) **96b:76118** 76W05 (57M25)

Berger, Robert W. Algebraische Theorie der Differentiale. [Algebraic theory of differentials] *Ann. Univ. Sarav. Ser. Math.* **5** (1994), *no.* 2, *pp.* i–iv *and* 103–244. (From the preface) **96c:13024** 13N05

Berger, Roger L. (*with* Liu, Hui Mei) Uniformly more powerful, one-sided tests for hypotheses about linear inequalities. (English summary) *Ann. Statist.* **23** (1995), *no.* 1, 55–72. (Nariaki Sugiura) **96m:62108** 62H15 (62C15)

Berger, S. A. (*with* Scalise, D. T.) An approximate theory for velocity profiles in the near wake of a flat plate. (English summary) Theoretical, experimental, and numerical contributions to the mechanics of fluids and solids. *Z. Angew. Math. Phys.* **46** (1995), *Special Issue*, S612–S626. (Summary) **96h:76032** 76D25

Berger, Thierry P. (*with* Charpin, Pascale) Groupe de permutations des codes affine-invariants. (English and French summaries) [Permutation group of affine-invariant codes] *C. R. Acad. Sci. Paris Sér. I Math.* **321** (1995), *no.* 10, 1383–1387. (Summary) **96j:94034** 94B60

— On the automorphism groups of affine-invariant codes. (English summary) *Des. Codes Cryptogr.* **7** (1996), *no.* 3, 215–221. (Robert M. Guralnick) **96m:20005** 20B25 (94B05)

Berger, Tor (*with* Strömberg, Jan-Olov) Exact reconstruction algorithms for the discrete wavelet transform using spline wavelets. (English summary) *Appl. Comput. Harmon. Anal.* **2** (1995), *no.* 4, 392–397. (Fritz Keinert) **96i:65114** 65R10 (42C15, 65T20)

Berger, Ulrich Programs from classical proofs. (English summary) *Proceedings of the 2nd Gauss Symposium. Conference A: Mathematics and Theoretical Physics (Munich, 1993)*, 187–200, *Sympos. Gaussiana, de Gruyter, Berlin*, 1995. (Mariko Yasugi) **96j:03075** 03F10 (03B70, 03F30, 03F55)

— (*with* Schwichtenberg, Helmut) Program development by proof transformation. (English summary) *Proof and computation (Marktoberdorf, 1993)*, 1–45, *NATO Adv. Sci. Inst. Ser. F Comput. Systems Sci.*, 139, *Springer, Berlin*, 1995. (From the text) **96h:03091** 03F07 (03F30, 68Q60, 68T15)

Bergeron, Anne Sharing out control in distributed processes. (English summary) *Theoret. Comput. Sci.* **139** (1995), *no.* 1-2, 163–186. (Summary) **96d:68048** 68Q10 (68Q22)

Bergeron, François (*with* Bousquet-Mélou, Mireille; Dulucq, Serge) Standard paths in the composition poset. (English and French summaries) *Ann. Sci. Math. Québec* **19** (1995), *no.* 2, 139–151. (David G. Wagner) **96i:05006** 05A15

— (*with* Favreau, Luc) Fourier transform over semi-simple algebras and harmonic analysis for probabilistic algorithms. Formal power series and algebraic combinatorics (Montreal, PQ, 1992). *Discrete Math.* **139** (1995), *no.* 1-3, 19–32. (Paul Jolissaint) **96e:20016** 20C30 (20F55)

— (*with* Favreau, Luc; Krob, Daniel) Conjectures on the enumeration of tableaux of bounded height. (English summary) Formal power series and algebraic combinatorics (Montreal, PQ, 1992). *Discrete Math.* **139** (1995), *no.* 1-3, 463–468. (Summary) **96f:05188** 05E10

— (*with* Sattler, Ulrike) Constructible differentially finite algebraic series in several variables. (English summary) Special volume on mathematical analysis of algorithms. *Theoret. Comput. Sci.* **144** (1995), *no.* 1-2, 59–65. (Ira Gessel) **96i:05007** 05A15 (12H20, 13J05, 34A25, 35A99)

Bergeron, Marc (*with* Hatcher, William) Models of linear logic. (English and Russian summaries) *Zap. Nauchn. Sem. S.-Peterburg. Otdel. Mat. Inst. Steklov. (POMI)* **220** (1995), *Issled. po Konstrukt. Mat. i Mat. Logike. IX*, 23–35, 145. (Summary) **96k:03137** 03F50 (03B20)

Bergeron, Mario (*with* Semenoff, Gordon W.; Szabo, Richard J.) Canonical *BF*-type topological field theory and fractional statistics of strings. (English summary) *Nuclear Phys. B* **437** (1995), *no.* 3, 695–721. (Paulo Teotônio Sobrinho) **96c:81137** 81T13 (81T30, 81T70)

— (*with* Semenoff, Gordon W.) The braid group of a canonical Chern-Simons theory on a Riemann surface. (English summary) *Ann. Physics* **245** (1996), *no.* 1, 1–22. (Mircea Zăgănescu) **96m:81146** 81T13 (20F36, 58Z05)

Bergeron, Nantel Hyperoctahedral operations on Hochschild homology. (English summary) *Adv. Math.* **110** (1995), *no.* 2, 255–276. (Summary) **96h:16009** 16E40

— Décomposition hyperoctahédrale de l'homologie de Hochschild. (French summary) [Hyperoctahedral decomposition of Hochschild homology] Formal power series and algebraic combinatorics (Montreal, PQ, 1992). *Discrete Math.* **139** (1995), *no.* 1-3, 33–48. (Claude Cibils) **96f:13025** 13D03 (16E40, 20F55)

— (*with* Wolfgang, H. Lewis) The decomposition of Hochschild cohomology and Gerstenhaber operations. (English summary) *J. Pure Appl. Algebra* **104** (1995), *no.* 3, 243–265. (Şerban Bărcănescu) **96i:13016** 13D03

Berggren, J. L. Abū Sahl al-Kūhī's treatise on the construction of the astrolabe with proof: text {Arabic}, translation and commentary. (English summary) *Physis Riv. Internaz. Storia Sci. (N.S.)* **31** (1994), *no.* 1, 141–252. (E. S. Kennedy) **96g:01010** 01A30

Berggren, Martin (*with* Glowinski, Roland) A spectral preconditioner for control problems associated with linear evolution equations. (English summary) *East-West J. Numer. Math.* **3** (1995), *no.* 2, 81–109. (Pekka Neittaanmäki) **96e:49005** 49J20 (49M30, 65K10)

van den Bergh, Michel *see* **Van den Bergh, Michel**

Berghammer, Rudolf (*with* Elbl, Birgit; Schmerl, Ulf) Formalizing Dijkstra's predicate transformer wp in weak second-order logic. (English summary) *Theoret. Comput. Sci.* **146** (1995), *no.* 1-2, 185–197. (Summary) **96e:68090** 68Q60 (03B15, 03B70)

vanden Berghe, Guido *see* **Vanden Berghe, Guido**

Berghuis, Harry (*with* Nijmeijer, Henk) Lyapunov control in robotic systems: tracking regular and chaotic dynamics. (English summary) *Appl. Math. Comput. Sci.* **5** (1995), *no.* 2, 373–389. (Inge Troch) **96m:93091** 93C85 (70B15, 70Q05, 93D30)

— (*with* Roebbers, Herman; Nijmeijer, Henk) Experimental comparison of parameter estimation methods in adaptive robot control. (English summary) *Automatica J. IFAC* **31** (1995), *no.* 9, 1275–1285. 93C85 (70B15, 70Q05, 93E10)

— (*with* Nijmeijer, Henk) On Lyapunov control of the Duffing equation. (English summary) *IEEE Trans. Circuits Systems I Fund. Theory Appl.* **42** (1995), *no.* 8, 473–477. (Summary) **96d:93033** 93C10 (93D15)

Bergia, S. A self-consistent framework for a propagating torsion field. *Courants, amers écueils en microphysique/Directions in microphysics*, 61–76, *Fond. Louis de Broglie, Paris*, 1993. (Maurizio Gasperini) **96d:83091** 83D05

— Aspects of quantum reality. (English summary) *Fundamental problems in quantum physics (Oviedo, 1993)*, 35–42, *Fund. Theories Phys.*, 73, *Kluwer Acad. Publ., Dordrecht*, 1995. (*see* **96k:81007**) 81P05
